

# The Place of Art at Fermilab

**Talk and Tour**

**Presented by Anne Mary Teichert**

Sponsored by NALWO Fermilab's Community Organization, to celebrate the 50<sup>th</sup> Anniversary of Fermilab

**Saturday, May 13, 2017**

**1 p.m.**

**Curia 2**

Since its conception, Fermilab has been a home to both science and art. Founder Robert Wilson used the laboratory as a canvas for his design ideas, leaving a memorable and lasting artistic impact. The Fermilab community has always included professional and amateur artists in its ranks of employees, spouses, and friends.

Anne Mary will explore this history and some of these personalities, using the original words of the founders and artists. The program will begin with a talk and slide show in Curia 2. We will then view a few artworks in Wilson Hall and (weather permitting) venture outside to view sculptures within walking distance.

Those who wish to explore further can do so with a map of other artistic items of interest on the site.

This program will be suitable for adults and teens. There is no charge, but reservations are requested by emailing [nalwo@fnal.gov](mailto:nalwo@fnal.gov) prior to Friday, May 12. We will limit reservations to 50 places.
